$$\phi = .25, \rho_{\text{tet}} = .40$$

2 x 2 tables identical

in A and B

A coherent: one minority carries all three edges (n = 18)

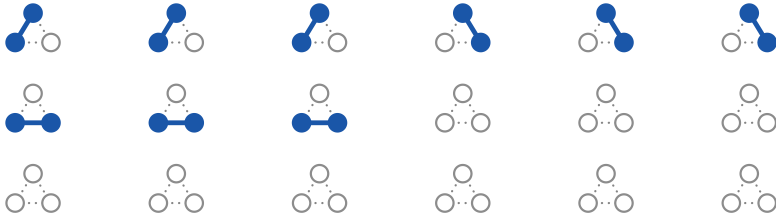

$$\bar{O} = +2/3$$

$$w^* = .19$$

(all 3 edges)

survive

B incoherent: three disjoint minorities, one edge each

$$\bar{O} = -1/3$$

$$w^* = 0$$

(all 3 edges)

removed
